## Wall Mounted Kiosk

The Abuzz Wall Mounted Kiosk is ideal for entry foyers and reception areas, as well as demonstration suites, product displays or exhibitions.

Its slim, stable design is equally suited to wall, desktop or stand mounting. Unobtrusive and elegant, the Wall Mounted Kiosk can provide intuitive self-directed interactions or transactions, in locations where space is at a premium, such as busy retail stores.

On secured floors, the Wall Mounted Kiosk with the Abuzz Personnel Directory software can replace a receptionist, with visitors able to search a directory and contact the person they are meeting by the attached handset.

The Wall Mounted Kiosk is also ideal for wayfinding within large organisations, seamlessly using corporate directory and Abuzz Wayfinding software to show location and best route.

Other uses include telephone banking and many transaction and information purposes.

Although the smallest in the Abuzz kiosk range, the Wall Mounted Kiosk can be customised to provide most of the functionality of a full sized Abuzz kiosk.
