Zap Kiosk

Sleek and elegant in its design, the Zap won an Australian Design Award in 2003 for its design excellence. The rotationally moulded rear casing has been optimised in CAD software for maximum strength and high aesthetic appeal. The Zap features a 17" high resolution LCD touchscreen display in a package standing just under 1.3m.

Tradeshows and small retail spaces are perfect for the Zap. Its compact dimensions make the Zap ideal for situations where space is at a premium.

Optional finishes include an embedded logo or graphic for a unique branding presence. Custom artwork can also be applied to the fascias if desired.

WINNER OF AUSTRALIAN DESIGN AWARD
